About Me

I'm a passionate Full Stack Developer who loves turning ideas into reality through code. I specialize in modern web technologies and enjoy building scalable, user-friendly applications.

Skills

- React, NextJs
- ExpressJS, NestJS
- Github, Git, Docker
- Javascript, Typescript
- RestfulAPI, GraphQL, WebSocket

Education

- **Study at Nguyen Van Troi high school**
High school 2022 - 2025
Even though I was a high school student, I was eager to learn and had early access to code. From then on, I became interested and passionate about developing with it.
- **Champion of The UEH Dancing Robot Contest**
Robocon Champion May 2023
My classmates and I went together, tried, and made the robocon. And we were so happy when we won the championship of that competition.

Experience

- **Freelancer as a web developer**
Working to build modern and high performance websites 2024 - Now
Currently diving deep into both frontend and backend development simultaneously. Gradually becoming proficient in frontend technologies such as React/Next.js, TypeScript, TailwindCSS, and Shadcn UI, while also developing the backend using Node.js, Express, NestJS, and modern backend tools.
